e -	Percenteres	of	individual.	offices	in	training	during	the	period	were:
-----	-------------	----	-------------	---------	----	----------	--------	-----	--------	-------

(1)	Office o	d the	ICI	2.3	F
-----	----------	-------	-----	-----	----------

- 7.0% (2) Deputy Director (Flans)
- (3) Deguty Director (Intelligence) 3.35
- 5.06 (h) Deputy Director (Support)

A. DECRES CH:

- a. The difficulties and edministrative burden involved in ceiling edjustments to "matherise 5% fever personnel....with an additional allowance of up to 5% to cover personnel actually undergoing formal training" indicate the impracticability of tempering with ceilings. Demond adjustments could freeze personnel "in process," step recruiting and temperarily recognize an "on-duty" strength in excess of a meaningless cailing figure, subject to upward adjustment on a subsequent increase in personnel undergoing formal training.
- b. The only true measure of the effort going into fermal training is to count actual hours of training and measure the total of such hours against the total svallable hours represented by the "on-duty" strength of the component. Using this method of computation, it has been deternined that the spirit and intent of the policy stated in subject reference is being met, that is, over 3% of the Agency Sendquarters "on-duty" personnel were in a training status during the period covered
- c. Homever, it is to be noted that on a component basis, the Office of the BCI and the BO/I did not have % of their "on-duty" personnel in a training status during the period. With respect to the latter this may be due in part to the fact that on-the-jeb training, which may represent a substantial effort, has not been formalized and cannot presently be recognized until such training has been properly defined and reported. Effort to this end is being furthered by the Office of Training.
- 4. It is indicated that a flat 7% requirement is immediable in some areas because of certain con-comparability factors. For example:

	(2)	With an initial training requirement for all communications	re-
25X1A		amitte feedaal This could be	TILL.
		in meeting the 5% quote without any developmental training,	(cm
		or external) for officer personnel.

- (2) In-casuals (FCS returness) often are entered in training pending reassignment. This credits the bendquarters though such personnel are charged to field ceilings.
- e. A flat 5% assessment across the board could result in a tendency to meet the requirement rather than obtain needed training in selected subjects.
- f. It is believed that the objective of the policy can be effectively monitored by:
 - (1) Notablishing % of the total available hours, represented by the "on-onty" strength of a major component, as the quota against which training will be measured.
 - (2) Subsequent to a report to be made 15 July 1955, for the period eaking 30 Ams 1955, quarterly reporting to the Director in the form of the charts shown in Tab A.

5. CONCUSSION:

- a. On a total Agency busis, the 5% policy has been met and exceeded.
- b. Quarterly reporting of actual hours of training measured against % of "on-duty" strength of components is preferable and more meaningful than mechanical and burdensome adjustments of callings and the administration thereof.
- c. Recognition should be given to "on-the-job" training effort and such program formalised and reported.
- S. NEWSCHER BEATTONS:
- a. That paragraph 3 of Agency Notice 29 October 1955, requiring 25X1A ceiling edjustments be rescissed.
- b. That quarterly reports on training effort be submitted to the Director for such action as he may does appropriate.
- c. That the Office of Training cotablish a formalised program, properly defined, to provide credit for "on-the-job" training.
